

PERSONAL AND MISSION STATEMENT

Beverley D. Wilson, M.D., J.D.

**“Living To Be A Force For Change -
A Clarion Call for Healthcare Access and Equity for Children”**

I am foremost a mother and a pediatrician. The welfare of children, my own and the many pediatric patients I have been blessed to provide healthcare for in South Carolina over the past three and a half decades, are at the very core of my being. Children are the most vulnerable members of our society and their healthcare needs are complex and specialized. I am a well-trained pediatrician and have special interests in asthma, allergies, atopic dermatitis, sickle cell anemia, autism, attention deficit and hyperactivity disorder, child abuse, and children with special needs. Please see my attached curriculum vitae for specific details of my medical and legal training.

I have practiced office-based pediatrics clinically for three decades and actively provide healthcare to and advocate for the rights of our most vulnerable citizens - physically, sexually, and emotionally abused children, especially autistic, educationally challenged, and emotionally disturbed pediatric abuse victims. The COVID-19 Coronavirus Pandemic has necessitated transitioning my traditional office-based pediatric practice to an online telehealth pediatric practice platform to safely provide healthcare during the COVID-19 Pandemic to my pediatric patients and those who wish to access my pediatric practice remotely for their healthcare needs.

I welcome you to continue or begin your child(ren)'s healthcare needs with me and schedule a telehealth office visit today to optimize safe access to and delivery of healthcare to your child(ren) during the COVID-19 Pandemic and beyond.

Beverley D. Wilson, M.D., J.D.
